PROFESSIONAL SUMMARY

Product Designer with 5+ years of experience delivering end-to-end UX/UI design for complex B2B SaaS products — including automation platforms, financial solutions, and data-intensive back-office systems. Skilled at structuring ambiguous problems, leading qualitative research, and transforming complex workflows and API-driven integrations into clear, intuitive, scalable experiences. Proven track record across startups and enterprise companies, collaborating with Product and Engineering teams throughout the full product lifecycle — from discovery and ideation to delivery and iteration. Leverages behavioral analysis, continuous usability testing, and data-driven validation to drive design decisions aligned with business goals and technical constraints. Brings experience navigating complex domain environments — including billing systems, consumption data, and multi-step operational automations — with a track record of measurable impact on engagement and retention.

CORE SKILLS & COMPETENCIES

Product Design & UX/UI: End-to-End Product Design, Wireframing, High-Fidelity Prototyping, Interaction Design, Responsive Web & Mobile Interfaces, Design Systems, Styleguides, Competitive Benchmarking, Design Review, Developer Handoff, Data Driven Iteration, Complex Workflow Design, Back-Office & Financial Solutions UX.

UX Research & Strategy: Product Discovery, Research Planning, Qualitative Research, User Interviews, Moderated Usability Testing, Asynchronous Testing (Maze, Typeform), Behavioral Analysis, User Journey Mapping, Service Blueprints, Stakeholder Mapping, Opportunity Tree (Teresa Torres), Quantitative Research, Co-creation Workshops, Design Thinking Facilitation.

Domain & Technical Fluency: B2B SaaS, Automation & AI Agent Platforms, API-Driven Integrations, ERP-Adjacent Back Office Systems, Billing & Consumption Data Interfaces, E-Commerce, Hospitality Tech.

Tools & Frameworks: Figma, Sketch, Adobe XD, InVision, Hotjar, Google Analytics, Mixpanel, Maze, Zeplin, Photoshop, Illustrator, HTML5, CSS, iOS Human Interface Guidelines, Material Design, Double Diamond, Lean Inception, Jobs-to-Be-Done (JTBD), OKRs.

PROFESSIONAL EXPERIENCE

Mid-Level Product Designer | Omnichat — May 2026 – August 2026

Designing end-to-end UX for *Whizz*, an AI agent platform for e-commerce, focused on making complex automation workflows and API-driven integrations accessible to non-technical users — from configuring customer service agents to autonomously managing post-sale operations.

Designing interaction flows and high-fidelity interfaces in Figma and Claude Design; actively contributing to the platform's design system and maintaining consistency across product surfaces.

Collaborating cross-functionally with Engineering and Product Management to ensure design intent is preserved through delivery, working at the intersection of intelligent systems and human-centered experience design.

Mid-Level Product Designer | Asksuite — June 2024 – May 2026

Served as Product Designer and part of the product leadership for *AskFlow Agents*, a B2B SaaS automation platform powered by specialized AI agents for the hospitality industry — involved from pre-launch through scaling, designing for complex operational workflows and multi-step automations.

Led discovery and qualitative research in strategic collaboration with Product Manager and Tech Lead, aligning business objectives with technical capabilities and API integration constraints; tracked product and business KPIs to continuously inform design priorities.

Designed complex interfaces prioritizing usability and operational efficiency, including drag-and-drop automation builders,

bulk management tools, and analytics dashboards — owning the full design cycle from concept through handoff and post launch iteration.

Senior Product Designer | Vivo Telefônica — July 2023 – June 2024

Led discovery and delivery of new features and UX improvements for a B2B e-commerce platform at one of Brazil's largest telecommunications companies, developing research plans, usability test scripts, and in-depth user interviews. Structured asynchronous usability testing via Maze and Typeform to scale research capacity and generate faster, data-backed design decisions.

Worked with the company-wide Design System to ensure experience consistency across platforms; aligned cross-functional stakeholders from business, performance, and technology teams to optimize the sales funnel and conversion.

Mid-Level Product Designer | Ília – Livelo — December 2022 – June 2023

Owned the product vision for a B2B2C e-commerce product at Livelo, leading Lean Inception workshops and facilitating co-creation sessions with multidisciplinary stakeholders to align priorities with company OKRs using Teresa Torres' Opportunity Tree framework.

Built solution hypotheses from Hotjar and Google Analytics behavioral data; validated via Maze testing and in-depth interviews — achieving 90% user comprehension of core product functionality in unmoderated tests.

Junior → Mid-Level Product Designer | Take.blip — February 2022 – November 2022

Embedded in a squad responsible for consumption data and billing back-office within Blip, a chatbot-building platform; designed a consumption analytics dashboard for a complex, data-intensive financial solution after conducting structured user interviews and mapping visualization needs across multiple business units.

Investigated the billing workflow end-to-end — including integrations with downstream financial systems — documenting friction points in a service blueprint that directly influenced company OKRs; post-launch, the solution drove a **3,500% increase in monthly active users** and an average retention rate of 80%.

Usability testing of the solution yielded a **68% task success rate** and a **SUS score of 82**, confirming strong perceived usability before release.

UX/UI Designer | Tokenlab — February 2021 – February 2022 (Intern → Junior)

Began product design career contributing to UX/UI projects, building foundational skills in user research, prototyping, interface design, and cross-functional collaboration with development teams.

EDUCATION

Bachelor's Degree in Architecture & Urban Planning | Universidade de São Paulo (USP) — 2016–2022

Emphasis in Computer Science | Universidade de São Paulo (USP) — 2018–2022

Scaling Design in Organizations | The Starter — 2023

Product Analytics | PM3 — 2023

Lean Design Documentation | UFSCar — 2023

Jobs-to-Be-Done | Product Crafters — 2022

Design Circuit 2.0 | Apparicio Junior — 2021

UX Design Essentials | Gabriel Silvestri — 2019
